## DCCB ANNIVERSARY

More than 200 members of the "Deutsche Club Costa Blanca" met on March 11 at the Salón de Banquetes GL to celebrate 30 years DCCB.

More information

The Town Hall of Teulada issues an appeal in order to prevent the proliferation of the tiger mosquito and to help minimise the problems caused by this insect.

This Town Hall recommends that citizens take the following action in their own private property:

- Empty exterior containers which can accumulate water: toys, ashtrays, vases, buckets, cans, plastic containers, plant pots, pett bowls, paddling pools, etc. Once a week, put them out to encourage the larvae to leave the containers.

Avoid water accumulation in drainage areas or gutters.

Avoid holes and depressions in the ground where water can accumulate, and cover holes in tree trunks by filling them with sand.

Protect wells and water tanks with mosquito nets.

meals.

- Carry out adequate maintenance of water in swimming pools through its chlorination to avoid breeding.
- If possible, keep their covered when in use, avoiding water accumulations on carousels and plastic covers.

Should you discover a problem in detached properties or estates, you are advised to carry out treatment using available products, or contact a company specialising in pest control, or carry out the pertinent treatment to the mosquitoes which are susceptible to the proliferation of mosquitoes.

For further information, please see the suggestions on the Dirección General de Salud Pública de la Conselleria de Sanidad Universal y Salud Pública's website, within the [www.san.gva.es](http://www.san.gva.es) portal.

In view of the continuing drought situation and the high level of water usage registered in recent weeks, after consulting us as well as our neighbors working at full capacity, we have had to focus our efforts on citizens to use tap water responsibly and to save.

- the watering of gardens and agricultural areas during the day
- the filling of swimming pools and paddling pools
- any unnecessary abuse of tap water

We ask all residents for their full cooperation to avoid future problems.

Angesichts des ständig hohen Wasserverbrauchs in den letzten Wochen, der an unsere Ressourcen geht, rufen das Rathaus die Bürger auf, verantwortlich mit dem Trinkwasser umzugehen und folgendes zu vermeiden:

- Gärten und landwirtschaftliche Flächen sparsamer zu bewässern
- Schwimmbecken und Rückhaltebecken zu füllen
- unnötig mit unserem Trinkwasser umzugehen.

Wir bitten alle Bürger um Mithilfe, um zukünftige Probleme zu verhindern.
