## AGRICULTURAL LAND BANK TEULADA MORAIRA

The municipality of Teulada Moraira wants to motivate owners of abandoned agricultural land to participate in the new land bank initiative and to cede the land to a third party.

The department of environment hopes to mitigate the problem of abandoned agricultural land and at the same time preserve old customs and make sure the younger generation will still be able to get to know the traditional ways of farming.

In the medium/ long term the land bank will help to solve agri-environmental problems such as abandoned agricultural land, erosion, negative aspect of the countryside, the dispersion of plagues and rodents as well as the danger of fires. The project will also have its share in maintaining the traditional agricultural aspect of the municipality.
